

# I-95 Express Lanes: Work Zone Fast Facts

The I-95 Express Lanes project is a 29-mile upgrade and expansion of HOV lanes on I-95/I-395, providing added capacity and more travel choices. Until these improvements are finished in late 2014, be ready for:

- Extensive lane closures and delays during non-peak hours (day and night)
- Full highway closures and detours overnight, as necessary
- Slower-moving trucks entering the work zone on the left
- Limited shoulder access

Plan ahead, slow down and drive with caution! New travel options coming soon. Thanks for waiting while we work.
